

ENERGY POLICY

Energy Policy

Introduction:

Aarti Drugs Ltd (ADL) Energy Policy reflects our commitment to energy conservation and reducing environmental and climate risks. It outlines our focus on energy conservation, environmental protection, and addressing climate change in product and process design as well as business decisions.

We are dedicated to continuously improving our energy management practices and performance, protecting the environment, and contributing to better climate conditions. This supports ADL's strategy of "Growth with Sustainability for Sustainable Growth."

Scope:

This policy applies to all our business operations, including subsidiaries we directly control. It covers our manufacturing sites, warehouses, offices, R&D facilities, employees, contractors, visitors, and other business partners working at our manufacturing locations. We also encourage our business partners in our value chain, even those outside our direct control, to follow the requirements outlined in this policy.

Our Policy:

Aarti Drugs Ltd is a leading manufacturer of Active Pharmaceutical Ingredients (APIs), API intermediates, and specialty chemicals. Our manufacturing processes consume a significant amount of energy, and as a responsible organization, we are committed to managing energy consumption efficiently.

We Shall:

- Provide a framework for setting and reviewing objectives and energy targets periodically, conduct regular audits, and identify opportunities for improvement.
- Ensure the availability of information and necessary resources to achieve energy objectives and targets.
- Comply with all applicable legal and other requirements related to energy efficiency, use, and consumption, thereby committing to the continual improvement of energy performance and the energy management system.
- Maximize the use of renewable energy in our operations.
- Support the procurement of energy-efficient products and services and incorporate energy performance improvements in design activities.
- Create awareness among employees and relevant stakeholders to encourage efficient use of energy resources, focusing on reducing energy intensity in operations and products.

- Measure and report energy consumption and associated greenhouse gas (GHG) emissions, and implement advanced cost-effective techniques such as the use of low-carbon alternative fuels for GHG reduction.
- Ensure the energy policy is available to interested parties as required, and communicate it effectively at all levels with regular reviews and necessary updates.

Implementation:

The Policy will be implemented through the framework of Aarti Drugs Management Systems.

Responsibility:

The ADL Board and members of the Sustainability Department are tasked with creating, executing, and overseeing the Policy. This responsibility is carried out in accordance with local laws and relevant standards.

Governance:

The Policy is governed by the sustainability department of ADL.

Review:

This Energy Policy will undergo regular reviews to address emerging risks, issues, and trends in our industry, ensuring its relevance and applicability. By default, the policy will be reviewed every five years.

Prakash M Patil

Chairman and Managing Director
