

# WATER POLICY

## Water Policy

### Introduction :

Aarti Drugs Ltd (ADL) Water Policy showcases our dedication to conserving water resources and working together with communities for a broader positive influence. It outlines our fundamental aim of integrating environmental protection considerations into product and process design as well as business decisions.

The policy is committed to ongoing enhancements in water management practices and performance, with a focus on safeguarding our environment and aiding in the improvement of climatic conditions. This commitment is in line with ADL's strategy of pursuing growth that is sustainable for long-term prosperity.

### Scope :

This Policy covers all aspects of our business activities, including subsidiaries under our direct management. It encompasses our manufacturing facilities, warehouses, offices, and research and development sites, as well as our employees, contractors, visitors, and other business partners working at these locations. Additionally, we urge our business partners who are involved in our value chain but are not directly under our control to adhere to the guidelines outlined in our Policy.

### Our Policy :

At ADL, we are dedicated to:

- **Proactive Compliance:** Ensuring compliance with all relevant laws and regulations concerning water, and striving to surpass them whenever feasible through our Aarti Drugs Management System.
- **Environmental Protection:** Safeguarding the environment by adopting cleaner technologies and incorporating environmental considerations into our business operations to prevent water pollution.
- **Water Resource Management:** Minimizing our impact on water resources by measuring water usage, reducing consumption through re-use, recycling, and utilizing advanced and cost-effective techniques.
- **Wastewater Management:** Managing treated wastewater through recycling and responsible discharge in line with industry best practices to minimize environmental impact.
- **Awareness and Education:** Promoting awareness of water conservation among employees and other stakeholders through education, training, and involving them in the protection and regeneration of water resources.
- **Communication:** Transparently communicating our water policy and conservation performance in accordance with national and international standards to employees, contractors, customers, the community, and other interested parties.

- **Resource Allocation:** Providing adequate financial and human resources to continually improve water conservation efforts and mitigate and adapt to water-related risks.
- **Objective Setting and Monitoring:** Setting, monitoring, benchmarking, and reviewing objectives and targets for water conservation performance, continually enhancing them through management programs and best practices.

### **Implementation:**

The Policy will be implemented through the framework of Aarti Drugs Management Systems.

### **Responsibility:**

The ADL Board and members of the Sustainability Department are in charge of creating, executing, and overseeing the Policy. This responsibility is carried out in accordance with local laws and relevant standards.

### **Governance:**

The Policy is governed by the sustainability department of ADL.

### **Review:**

The Water policy will be regularly reviewed to address new risks, issues, or trends in our industry and operating environment, ensuring it remains relevant. By default, the policy will be reviewed every five years.
